

M-CRAMER TRACKING

Iridium GO! provides inbuilt GPS receiver and Tracking Features for positions sending via SMS.

Iridium GO! does not support Iridium SBD-Service.

ONLINE TRACKING PLATFORM

You'll find our tracking solution on www.m-cramer-tracking.de

FEE + SERVICES IRIDIUM GO!

There are two different kinds of tracking accounts: Basic and Pro.
We charge a onetime fee of 15 € for creating the account itself.

For Iridium GO! you have to book the online platform Basic or Pro **without** SBD the position messages by SMS / email must be sent to a special address (see below: tracking with Iridium GO!). From there, they will then be redirected to the tracking platform. Individually sent SMS / email are charged with additional fees according to your SIM card contract.

Basic	Pro
Online Platform (SMS)	Online Platform (SMS)
11,50 US\$ per calendar month	28,00 US\$ per calendar month per asset

The prices above are including Germany VAT. The prices for Online Tracking Service will be charged for each calendar month, regardless the specific date of activation / deactivation.

Embedding the tracking platform on (your) website		

TRACKING VIA IRIDIUM GO!

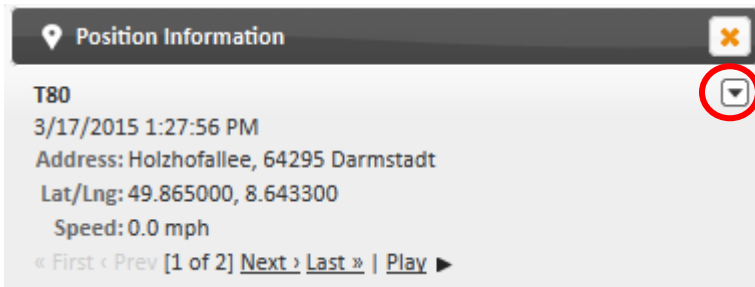

Tracking has to be configured via the Iridium GO! application on your smartphone. Go to the Iridium GO! application / Settings / Track, set the Tracking Frequency and add **go@gsattrack.com** as Tracking Recipient.

Attention

After deactivating the tracking account, all data will be deleted, including your position data. Save them BEFORE logging out!

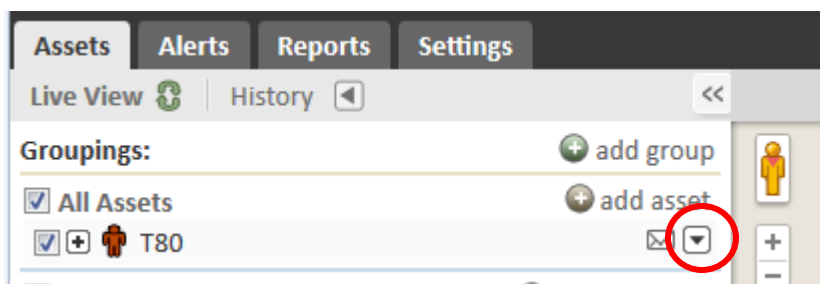

TO SEND MESSAGES

You can send messages from platform to the phone. To do this, click e. g. the device icon in the map. A small window opens in which date, time, device name and location are indicated.

Click the Pulldown on the right to open the context menu. You'll find Send Message.

Alternative you'll find the pulldown at "Add asset".

Messages from the platform are sent via SMS and free of charge. The **incoming message** on the phone is sent by **p@m-cramer-tracking.de**. You can't reply this email message.

Free text messages from your GO! to the recipient +442381680112 from the GPS Quick List or any other email address are sent to the platform too and listed **under Messages / Incoming**.

Messages sent from a standard email account to 8816_your_phonenumber@msg.gsattrack.com are transferred to your phone. Transmitted is the message body, not the subject (format of the message received: message text from submit-email address). These messages can be found again on the platform under **Messages / Outgoing**.

Messages sent from Go! as **SMS to an email** address don't reach the platform but the addressed email account (charged as a standard SMS via SIM card). The submit-address is phonennumber@msg.iridium.com. (format: 8816xxxxxxx@msg.iridium.com)

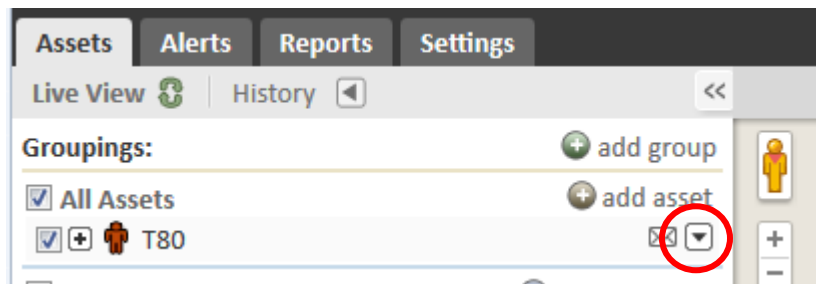

HOW TO EMBED THE TRACKING PLATFORM IN AN OWN WEBSITE

In order to embed the tracking platform a Pro account is mandatory. Here you have the possibility to create an anonymous read-only user with no need of login data. An exactly description of how to embed you can find here:

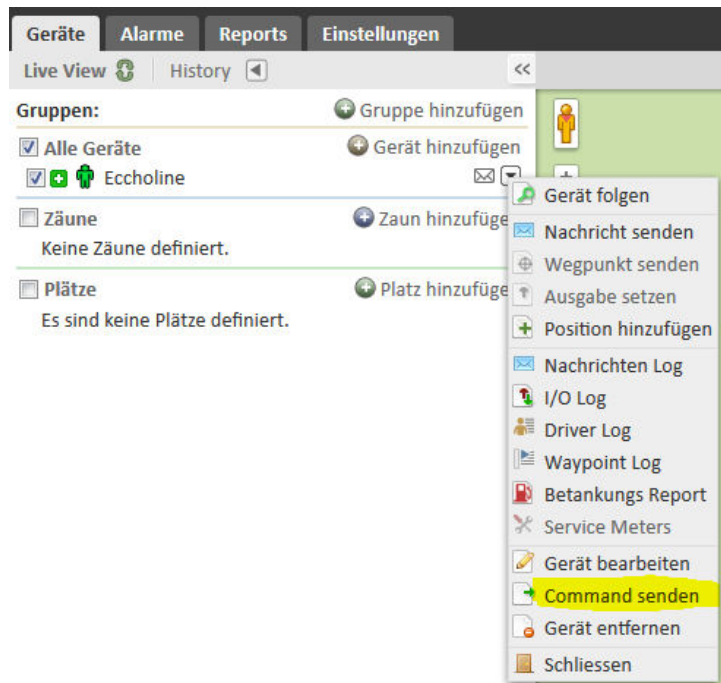

<http://www.gsattrack.com/wiki/URL-Parameters.ashx>

REQUESTING GO! POSITION FROM PLATFORM
