## **2 STAGE DIALING**

The 2-Stage Dialing Platform (PSTN originated dialling) was developed to allow callers to call an Iridium subscriber via fixed phone, e. g, when satellite numbers are barred by provider or to share call charges.

The calling party dials the USA number **001 480 768 2500**.

This connects the caller to Iridium's Two-Stage Dialling platform located in the Tempe, Arizona. Using automated voice prompts, the calling party enters the Iridium subscriber's phone number (8816.....). The system will identify the IRIDIUM subscriber and put the call through to the phone. If the customer is not available, the caller will have the option to leave either a numeric or voice mail message. The voice prompts on this platform are in English language only.

The calling party is charged long distance rates from their origination point to Iridium's Two-Stage Dialling Platform in the Tempe Gateway through their own LD carrier. The Iridium Customer is charged according to fees in table above.

## **+1 SERVICE (PERSONAL 2 STAGE DIALLING)**

The +1 service allows you to call an Iridium satellite phone via an **individually assigned US** landline number, e.g. if your telephone provider prohibits dialling from the Iridium network or if the connection charges are to be split.

There is no need for the calling part to enter the Iridium telephone number as with 2 stage dialling, the connection is forwarded directly to the satellite telephone. This service is only available in English. The caller is charged for his to the USA, the called Iridium customer is charged an amount per minute according to the above tariff table.

- \* These additional services are charged pro rata in the month of activation. In the month of deactivation, the services are charged in full, regardless of the exact date of deactivation. If activation and deactivation fall in the same month, this month will be
